Blackfox Expands

Press Release

Blackfox Training Institute, LLC., headquartered in Longmont, Colorado, reports that it officially expands into three additional locations nationally and internationally.

Longmont, CO, November 11, 2013:

Blackfox Training Institute reports that it officially expands its training and certification services to three additional locations with new facilities. In addition to the Blackfox headquarters located in Longmont, Colorado, Blackfox now has new facilities in Tempe, Arizona, Guadalajara, Mexico, and Penang, Malaysia. Each of these facilities offers the same IPC Certifications and Blackfox Skill-based Certifications as offered in Colorado. Additional locations are planned in the near future.

This expansion was essential in order to create a channel for delivering the IPC Quality Standards and skill-based training and certification to areas of high demand and reduce the travel costs for customers nearby. Each of the Blackfox Training Centers have resident Master IPC Trainers as well as Master IPC Trainers that travel the world delivering all of the training programs at their customers' facilities.

You are invited to experience the Blackfox difference, regardless of location. From our Master IPC Trainer's dynamic presentation to our outstanding customer service, you'll know that training is our passion. Our courses have value-added wisdom drawn from years of experience working and training in the Electronics Industry.

IPC certifications will demonstrate your commitment to customer requirements and greatly facilitates other quality assurance initiatives. We look forward to supporting your training requirements and your quest for excellence.

About Blackfox

Blackfox is the leader in providing quality training systems and custom courses to the electronic manufacturing industry's cutting edge companies. Blackfox is also the premier worldwide authorized IPC training center, providing all current IPC Certifications. For more information, visit them on the web at www.blackfox.com.
